

Reduce fraud and out-of-policy spend with Rydoo Smart Audit

Smart Audit uses **Artificial Intelligence** to automatically analyse all of your employees' expenses. It detects and flags non-compliant and suspicious claims, enabling finance teams to reinforce spend control while reducing the need for manual checks.

Your company might be reimbursing out-of-policy expenses

5%

of expense reimbursements are estimated to be fraudulent.

- **Personal expenses:** Submission of non-business expenses.
- **Falsified expense claims:** Submission of false or altered expenses.
- **Inflated expense claims:** Submission of expenses above the actual value.
- **Duplicated claims:** Multiple claims for a single expense.

Rydoo Smart Audit equips your finance team with automated expense checks

Benefits of Rydoo Smart Audit

Reduce out-of-policy spend

Reduce out of policy spend by flagging duplicates, errors, and fraudulent claims.

Ensure compliance

Monitor 100% of your expenses in real-time to ensure compliance with both local and company regulations.

Improve productivity

Minimise the workload for approvers and finance teams, enabling them to focus on strategic tasks.

An additional layer of expense control, fully integrated into your flow

SUBMIT: Employees submit expenses through the Rydoo mobile or web app.

APPROVE: Smart Audit performs multiple AI checks and flags suspicious activity to the approver and controller for additional review.

CONTROL: The finance team performs additional checks if necessary and syncs data with their ERP.
